

## Automated cleaning systems.

Custom made automated cleaning systems.

For automatic cleaning of machinery and production equipment in the food-processing industry, such as conveyor belts, tanks and vessel washing, automatic cleaning satellites with solenoid valves.

A compact design to fit directly in production areas where automatic cleaning is needed.

The customized solutions are very flexible due to the many possible options. Different injector sizes and outlets for manual cleaning can be added to the system.

The built-in controller and display is easy to use. It controls the pump, cleaning program and external valves.

### Features RHINO MP CCU Hydraulic:

- Economic solution.
- Low maintenance.
- Precision dosing.
- Big volume.
- Easy to adjust.

### Functions:

- Automatic clear water rinse.
- Automatic foam cleaning.
- Automatic disinfection.

### Equipped with:

- Hydraulic dosing pump(s).
- PLC controlled.
- Solenoid valve block(s).
- Frequency controlled water supply pump.
- Flow meters(s).
