

### Heavy-duty Liquid transport hose reels.

This stainless steel manual hose reels are specially designed for the storage and handling of hoses for transporting food, drinks, agricultural, chemicals and marine applications.

The use of this hose reel prevents hoses from lying on the floor in production areas resulting in unsafe work situations, hose breakage, hose wear and poor hygienic situations.

- ✓ Prevents unsafe work situations.
- ✓ Increases hygiene.
- ✓ Reduced working hours.
- ✓ Reduced wear and hose breakage.

### Stationary hose reels for liquid transfer

Type	260.AVM2090	260.AVM2095	260.AVM2096	260.AVM3090
*Material	Stainless steel	Stainless steel	Stainless steel	Stainless steel
**Diameter hose	2" - DN50	1 1/4" - DN32	1 1/2" - DN38	3" - DN75
Max. hose length	20 meter	50 meter	30 meter	10 meter
Max. working pressure	10bar	10 bar	10 bar	10 bar

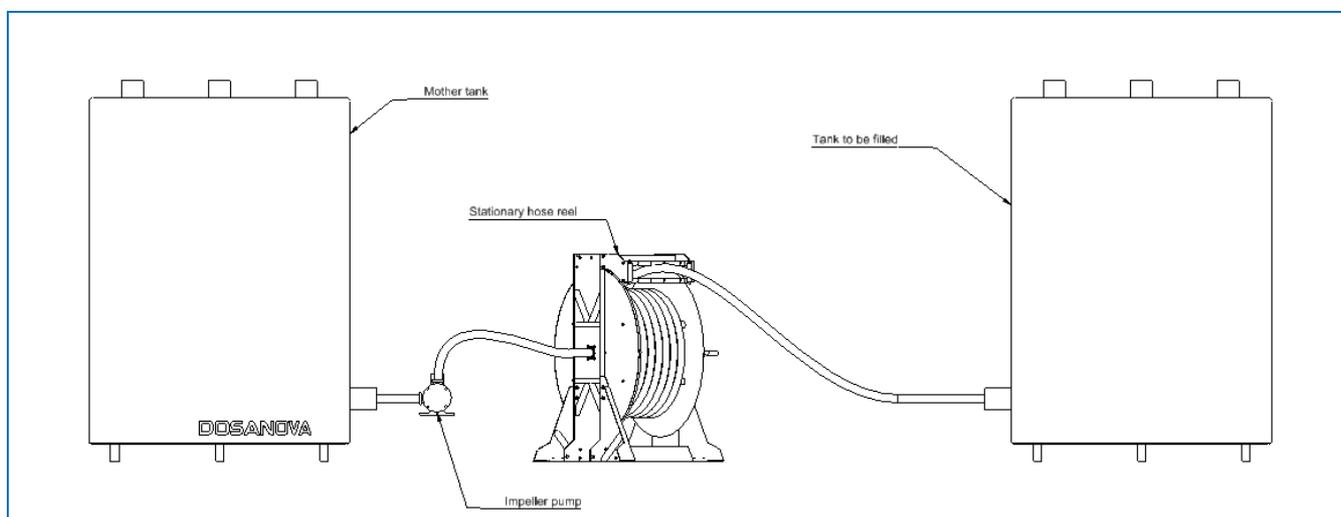

\*Stainless steel AISI316 on request

\*\*Bigger hose Ø on request.

The fixed hose reels are placed next to a transfer pump or near a mother tank that can then be easily connected and couple to another tank or system.

While the hose is being rolled back onto the drum, it is easy to clean the hose exterior. At the same moment the user can control the hose for defects or wear.

By integrating the hose in the CIP process the interior of the hose and reel are automatically cleaned with the tank which means that Disinfection baths for hoses are no longer needed.

## Mobile Hose reels for liquid transfer.

Type VP2090

The mobile liquid transfer hose reels make it possible to use the reel on several different tanks.

The principal of use is the same like the stationary liquid transfer hose reel.

### \*\*Tank cleaning.

Mobile hose reels are very useful to use with rotating cleaning heads.

rotating spray heads consume 90% less water than spray balls with a much better result.

Contact Dosanova to select the correct tank cleaning rotating head for your specific tank.

\*Hose not included.

\*Hoses are not included in liquid transfer hose reels.

Contact Dosanova for the correct liquid transfer hose, steam hose, CIP hose...

### \*\*Check Dosanova for rotating heads and tools for tank cleaning.
