

Manual stainless steel hose reels:

- The STKI series are suitable for applications in craft and industry:
- The base frame is made out of canted stainless steel sheet profiles which stand for excellent stability.
- The drum rotates by means of an adjustable hand wheel being equipped with free-wheel polyamide grip.
- By means of a mechanical brake integrated in the bearing the drum can be slowly decelerated or even totally blocked.
- Suitable for mediums water, water with detergent, air, oils and greases.
